

- The thickness of our Paper Tape 160° is 135 microns and has a rubber backing adhesive specially designed to prevent the formation of residues after peeling off
- Good Heat resistance,.
- Specially suited for hardware, electronic and electric appliance, spray paint, wet paint, fix and protection purposes

SPECIFICATIONS		
Reference	CRP-	
Colour	BEIGE	
Total Thickness	0.135mm	
Backing type	Crepe paper	
Adhesive type	Rubber	
Adhesion to Steel (Kgf/Inch)	6	
Tensile Strength (Kgf/Inch)	7	
Elongation at Break (%)	8%	
Storage Condition	20°C / 65%R.H	68 °F / 65%R.H
stripping resistance (N/25mm)	5 N/25mm	
Maximum Temperature Resistance	160°C	320°F
Length per roll	55m	60.15 yd
Width	5~990 mm	0.2~38.97 inch

•Our tapes always have a plastic core and are shrink wrapped

GLOBALMASK is fully committed to the manufacture and supply of a wide family of masking products. We supply them since many years, and our customers are fully satisfied with the quality of our products. We are proud to listen to our customers demands with the objective to continuously increase our product portfolio without compromising their performance.

Our quality control procedures are applied during the production of all our masking products. GLOBALMASK reserves the right to modify products with, however, the intention to improve their performance. In such a case we will always keep our customers informed.
