DESCRIPTION:

Silicone Squared Cover 315°C

MATERIAL:

High temperature Silicone 315°C

See the material data sheet

DIMENSIONAL TOLERANCE

The dimensional tolerance of the Silicone Squared Cover is according the RMA A3

APPLICATIONS:

Powder Coating, Wet Coating, E-Coating, Plating, Anodizing.

USES:

This rectangular cover is used to hide rectangular wire end connectors or rectangular plate either to prevent contact with the surface treatment or to prevent blows during handling.

RECOMMENDATIONS of USE:

Choose the dimensions "A" and "C" according to the plate length and thickness and check that inner dimension "B" is long enough to cover the plate completely.

STORAGE RECOMMENDATIONS:

Storing this product away from direct sunlight and at a temperature between 20° C and 25° C is recommended in order to prevent any modifications to the properties such as flexibility, elasticity or decolouring, among others.

The material this product is made of possesses no health risk nor is it considered hazardous requiring consideration when handling or storing it.

EXPIRY

This product does not expire, but it may lose plasticity and flexibility if stored inappropriately and/or for more than 5 years.

USEFUL LIFE OF THE PRODUCT

The useful life of this product depends on the conditions and loads it is subjected to during the process.

Chemical products may reduce the useful life of the product.
